Dear Mr. Lichtenstein:

Re: **Lenox China - Pomona**
Influent/Effluent Monitoring Report Forms
Galloway Township, Atlantic County

On Friday October 15, 1993, John Kinkela, Lenox Director of Environmental Affairs contacted Mr. Daryl Clark, NJDEPE Project Geologist requesting some information regarding the new influent/effluent monitoring report forms. As articulated to Mr. Kinkela, the old DMR forms required information on flow that is not required on the new reporting forms. Attached below, please find the submittal requirements regarding flow data that Lenox must submit. These requirements are being sent to Lenox to memorialize that conversation and insure that there are no misunderstandings.

1. The influent\effluent monitoring report forms are to be submitted quarterly in accordance with Table 4 of Part VIII-DGW-I of the NJPDES permit. The flow should be reported as the average per day for the entire quarter.
2. A separate report is also required to be submitted quarterly along with the influent\effluent reporting form. This report will detail the flow information for each month of the quarter. This information will include:
 - a. total volume each month of water withdrawn
 - b. total volume each month of water reinjected
 - c. any malfunctions or upsets in the system during the quarter

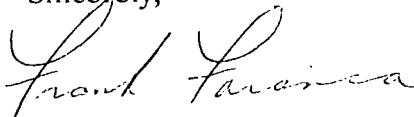

This information will no longer be reported on DMR form 33201-1 as done previously since these forms will no longer be issued to Lenox for their TCE system.

651179

If you have any questions, please contact me at (609) 633-1455.

Sincerely,

A handwritten signature in cursive script, appearing to read "Frank Faranca".
